

NEW MODEL • SEPT 1 2026

FABLE 5.1 JUST DROPPED.

ANTHROPIC'S NEW FLAGSHIP. I READ THE FULL LAUNCH POST SO YOU DON'T HAVE TO. 6 THINGS THAT ACTUALLY MATTER.

```
$ claude --model claude-fable-5-1  
-> Claude 5 family, tier above Opus  
[OK] beats Opus 5 on every disclosed benchmark  
[OK] same $10 / $50 price as Fable 5  
[OK] live on API, Bedrock, GCP, Foundry day one
```

FACT 01

FIXES THE ROOT CAUSE. NOT THE SYMPTOM.

ANTHROPIC'S OWN WORDS: IT "AVOIDS SHORTCUTS THAT RESULT IN POORER-QUALITY WORK." FEWER RE-DO LOOPS.

* What changed:

```
$ fix the failing test
```

```
[X] old habit: patch the assert, move on
```

```
[OK] 5.1: traces the bug to its source
```

```
[OK] fixes what broke, not what screamed
```

FACT 02

TERMINAL WORK MORE THAN DOUBLED.

TERMINAL-BENCH-SCIENCE: 52.6%. FABLE 5 SCORED 24.7%. OPUS 5 SCORED 29.0%. TERMINAL-BENCH 4.0: 55.8%.

* Anthropic-reported scores:

```
-> Fable 5 ..... 24.7%
```

```
-> Opus 5 ..... 29.0%
```

```
[OK] Fable 5.1 ..... 52.6%
```

```
-> long shell sessions = its home turf
```

FACT 03

CACHE READS 75% CHEAPER.

\$1.00 DOWN TO \$0.25 PER MILLION TOKENS. BASE PRICE UNCHANGED.
AGENTS THAT RE-READ THE SAME CONTEXT WIN BIG.

* Pricing per 1M tokens:

-> input \$10 · output \$50 (same as before)

[X] cache read was \$1.00

[OK] cache read now \$0.25

-> caveat: verbose at max effort, cap output

FACT 04

FEWER FALSE REFUSALS.

BIO SAFEGUARDS FIRE 85% LESS ON BENIGN ASKS. CYBER INTERVENTIONS DOWN ~60% PER SESSION. LESS NANNY, SAME GUARDRAILS.

* Safety, per the launch post:

-> Fable 5.1 = public, extra dual-use guards
-> Mythos 5.1 = same model, trusted access only
[OK] benign security work refused less
[OK] enterprise zero-retention option

FACT 05

LIVE EVERYWHERE. DAY ONE.

CLAUDE API · CLAUDE CODE · AWS BEDROCK · GOOGLE CLOUD · MICROSOFT
FOUNDRY. NO WAITLIST.

* Swap one line:

```
$ model: "claude-fable-5-1"
```

```
[OK] Bedrock + Vertex + Foundry same day
```

```
[OK] batch API at half price
```

```
-> it even mapped Venus terrain at 2-3km
```

SO, SWITCH?

WORTH IT FOR **HARD** WORK ONLY.

YES FOR LONG AGENT RUNS AND UGLY BUGS. NO IF YOU JUST NEED CHEAP TOKENS. OPUS 5 IS STILL HALF THE PRICE.

01. Save this for your next model swap.

02. Follow @skynetlabs

03. Which model runs your agents today?
